

STREET SIGN ORDERING INFORMATION

Sign Specifications:

9" wide extruded aluminum blade
5" white letters on green background
PVT designation as required (indicates "Private")

STOP signs are to be 24" in size

Installation:

Street signs posts should be positioned five feet (5') off the side of the pavement and sunk in the ground. It is recommended that the street blade is located 7' to 8' from the ground.

For Stop Sign installations, please contact NCDOT Maple Maintenance yard.

Street name sign and stop sign must be installed prior to approval of private access and final subdivisions.
